How to Complete RAR Manager Reviews

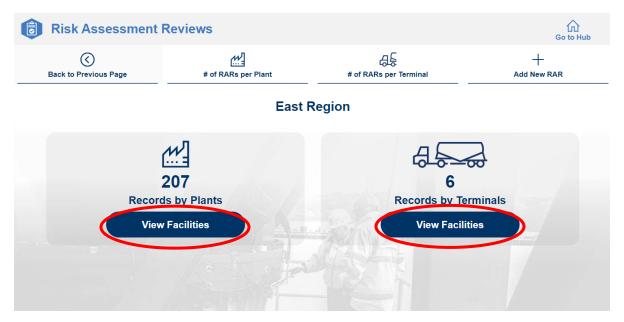

1. Navigate to Risk Assessment Reviews (RAR) through the Cement Safety Apps.

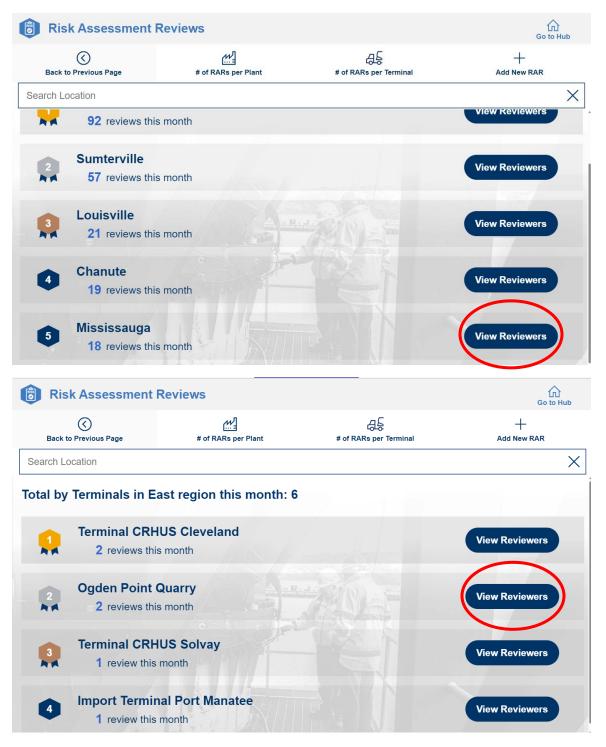

2. Navigate to RAR submissions at our plant/quarry by clicking on "View Facilities" next to the East Region.

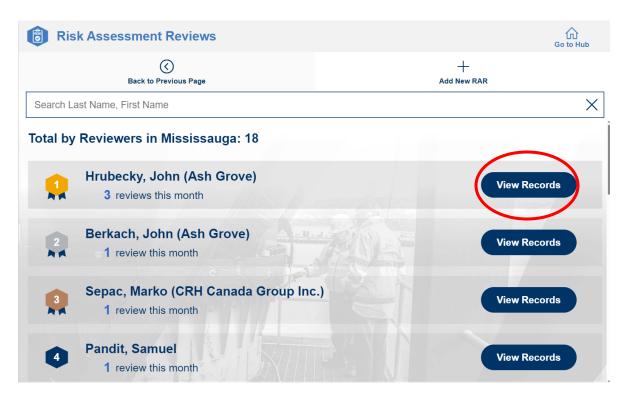

3. To view submissions at the plant, click on "View Facilities" underneath Records by Plants. To view submissions at the Quarry, click on "View Facilities" underneath Records by Terminals.

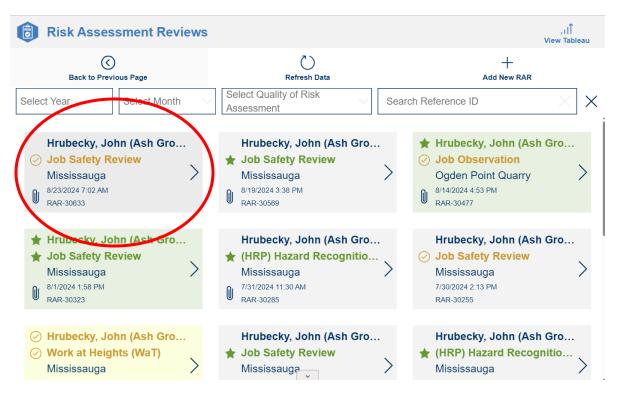

4. Scroll down to locate our plant, Mississauga, or our Quarry, Ogden Point Quarry, and click on "View Reviewers".

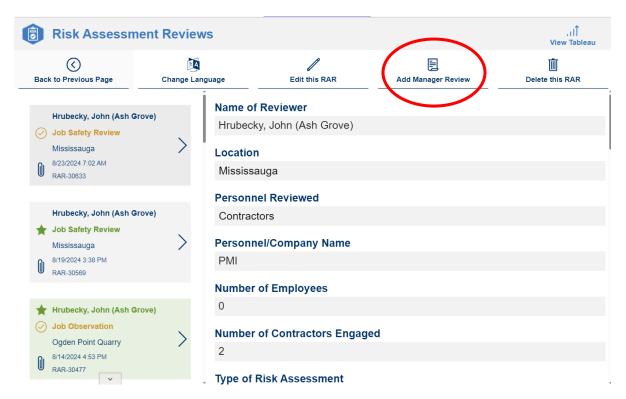

5. Choose any person who has submitted an RAR this month and click on "View Records" beside their name. This can be a direct report within your department or be from any other department.

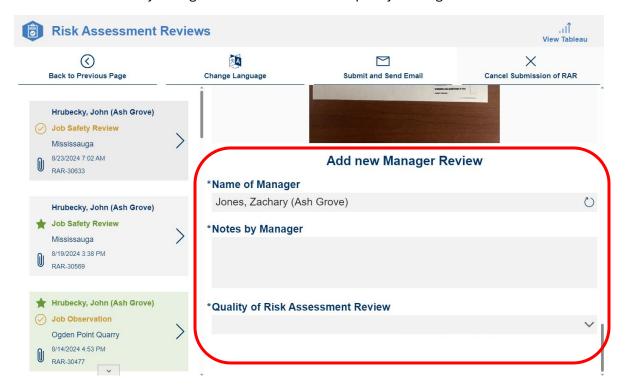

6. Open one of their submissions for the current month, by clicking on the arrow on the right side of the box.

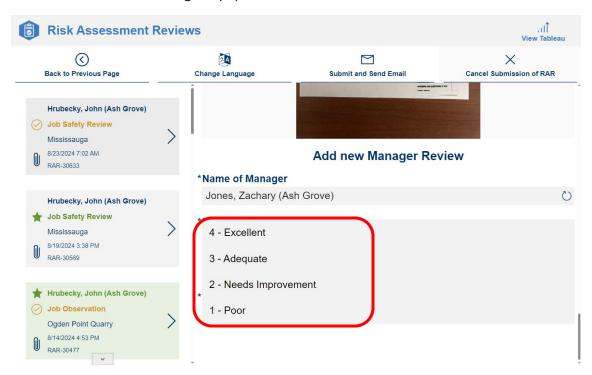

7. Locate the task bar at the top of the submission and click on "Add Manager Review".

8. Review their RAR submission. Once finished, scroll down to the bottom and you will see a box titled "Notes by Manager". This space is for you to give feedback based on their submission. Below that, you will see another box titled "Quality of Risk Assessment Review". This is a drop-down answer which allows you to give the submission a 1-4 quality ranking.

An important note when giving a quality ranking of the RAR: Keep in mind that this is a Risk Assessment. Take into consideration the following: Was a photo added? Amount of detail added in their RAR submission. Did their actions exceed our safety standards (e.g. use of orange physical barrier fence instead of danger tape).

9. Once you are finished with the Manager Review, click on "Submit and Send Email" located at the top of the task bar. This will send an email notification to the individual you have reviewed with your comments and feedback.
